September 25, 2023

Dear Dr. Fischer Simon-Raphael  
National Center for Theoretical Sciences  
National Taiwan University

I would like to invite you to the upcoming **East Asian Symplectic Conference**. This will be a seven-day conference held on **October 29th - November 4th, 2023** at Ocean Suites Jeju hotel, Korea. During the conference, we will arrange and cover your local accommodation for up to six nights.

The recent progress in Symplectic Geometry and Topology has revealed fascinating and profound phenomena in both mathematics and mathematical physics. In recent years, there has been a remarkable increase in the number of researchers in East Asia working on this exciting field of Mathematics. This conference aims to provide a platform for symplectic geometers and topologists to connect with new colleagues who share their interests or work in related areas.

We are very excited about this workshop and hope that this will be an intellectually invigorating and well-attended event. On behalf of the other conference organizers, I very much hope you will accept our invitation.

Sincerely yours,

Hansol Hong
